

Titel

ReactIR 701L with DST 6.35 x 1.5 m x 305 DiComp probe (storage loaction: ZAF 107)

Table

Device name	ReactIR 701L with DST 6.35 x 1.5 m x 305 DiComp probe	Hier add the picture of the device.
Model number	/	
Manual	On comuter for react IR	
Location	ZAF 107	
Name in Instruments Calendar	/	
Introduction	yes - either responsible person from AG Schubert or AE	
Responsible Person	currently in AG Schubert: not clear, last used by Michael Ringleb, supervisor: Stefan Zechel Water splitting group: AE	
Protocol on usage of the device	Protocol - In-situ IR measurment with ReactIR 701L in GL14 flask under inert conditions	
Additional Information	be careful with the glas fiber cable, for questions, which cannot be answered by AE or AG Schubert ask customer support from Mettler Toledo	
Status from	02.06.25
